

Result is green so no further improvement is required at this stage.

However, we can still improve the following.

### Browser Errors:

- Issue: Errors were logged to the console during the execution of the JavaScript bundle (bundle.js).
- Solution: Investigate and address the specific errors mentioned in the console logs. In this case, there are TypeError issues related to reading properties of null during the token validation process. Ensure proper error handling and fix the root cause of these errors to enhance the stability and functionality of the application.
